Spill Resistant Fabric

Nano-Tex Resists Spills provides breakthrough spill resistance. Each fiber has been fundamentally transformed through nanotechnology, and the result is a fabric that:

- ✓ Repels liquids
- ✓ Provides long lasting protection
- ✓ Extends the life of the fabric
- ✓ Retains fabric's natural softness
- ✓ Allows fabric to breathe naturally

Antimicrobial Technology

Meta delivers world class protection to you in a new performance labcoat that is powered by X-STATIC®

Specifically designed to protect the lab coat from odor causing bacteria, the X-STATIC® silver technology also delivers performance that helps regulate your body temperature as well as the reduction of static build up. Unlike many other anti-microbial finishes in the market place, you know you are wearing performance because you can actually see the silver!

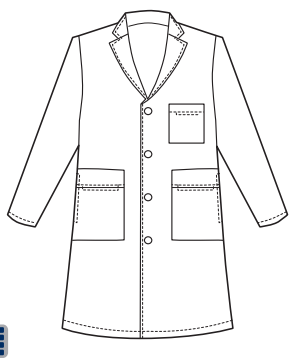

2% X-Static©
Silver Twill

X-STATIC® and The Silver Fiber® are trademarks of Noble Biomaterials, Inc., the global leader in antimicrobial solutions.

1% Carbon Fiber

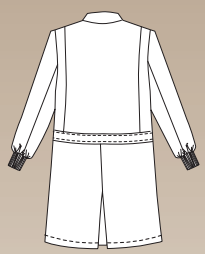

Antistatic Technology

META utilizes cutting-edge technology in our fluid resistant Labcoat.

Performance and comfort! This Labcoat fabric is high filament 99% polyester with 1% carbon for static dissipation. The polyester makes for increased fluid resistance while air-texturing makes the coat soft and comfortable to wear.

Back Vent for full coverage when seated

Create a Unique Identity

We offer the latest technology in embroidery design and application. Create a unique identity by adding name or job title to your customer's new uniform. Orders must be in writing and color of embroidery specified. Embroidery can be up to 4 lines.

Custom logos can be embroidered - please ask your customer service representative for a special price quote.
Artwork submitted with color requirements takes two days for a price quote plus 2-3 weeks for a sample for your approval.
Please allow an additional two weeks for delivery of finished garments..
